PROFILE

Flutter Developer with 2+ years of experience designing, developing, and maintaining cross-platform mobile applications using Flutter and Dart, backed by Python-based APIs. Experienced in Clean Architecture, BLoC/Cubit, Provider, RESTful APIs, Dio, Firebase, Hive, Shared Preferences, and state management. Skilled in UI optimization, debugging, manual testing, edge-case validation, Jira, TestFlight, and Agile development, with a strong focus on delivering scalable, high-performance, production-ready applications.

PROFESSIONAL EXPERIENCE

Flutter Developer | Feb 2026 – Present [IT-Vision.odoo](#) | Full-Time

Developed, maintained, and optimized cross-platform Flutter applications for Android and iOS by implementing new features, responsive UI animations, and scalable architectures.

Investigated, reproduced, and resolved bugs through code refactoring and performance optimization, improving application stability, responsiveness, and user experience.

Performed comprehensive manual testing, including functional, smoke, regression, integration, end-to-end, edge-case, and REST API validation across offline, network interruption, timeout, and error-handling scenarios.

Validated releases across Android and iOS devices, multiple screen sizes, OS versions, Arabic/English localization, and TestFlight builds to ensure production readiness.

Managed tasks, documented defects, and tracked bug resolution using Jira while collaborating with cross-functional teams throughout the software development lifecycle.

Teaching Assistant Sep 2024 – Present Pharos University – Faculty of Computer Science | Alexandria, Egypt

Appointed as a Teaching Assistant in the Computer Science Department and selected as one of two members of the Dean's Technical Office, contributing to faculty-wide technical initiatives.

Delivered Flutter, Dart, and Software Engineering lab sessions covering state management and mobile application architecture.

Mentored students through real-world Flutter applications and graduation projects by providing technical guidance, code reviews, debugging support, and structured performance feedback.

Developed practical assignments and technical learning materials tailored to mobile application development.

Deep Learning Intern 08/2022 – 10/2022 Najah Now – Sponsored by ITIDA | Alexandria, Egypt

Worked on Natural Language Processing (NLP) projects using deep learning algorithms

Built and evaluated NLP models for text classification and analysis tasks

Collaborated with team to optimize model performance and accuracy metrics

Web Development Intern 05/2022 – 07/2022 Najah Now – Sponsored by ITIDA | Alexandria, Egypt

Developed and optimized front-end and back-end web applications

Debugged and improved application functionality and user experience

Collaborated with developers to implement new features

IT Intern 05/2021 – 07/2021 Banque Misr – IT Department | Alexandria, Egypt

Gained experience in IT support, systems management, and technical troubleshooting

Managed employee data and assisted with internal IT systems and workflows

IT and HR Intern 08/2021 – 10/2021 Housing and Development Bank – IT Department | Alexandria, Egypt

Assisted with IT infrastructure tasks, employee data management, and customer service

Contributed to improving customer service protocols and response times

FLUTTER PROJECTS

Shop App – Full E-Commerce Mobile Application

Tech: Flutter, Dart, REST APIs, BLoC/Cubit

Integrated RESTful APIs for products, categories, cart, orders, and user authentication

Implemented favorites, cart persistence, search, filtering, profile management, and order history using BLoC/Cubit

Built with a scalable architecture supporting light and dark themes.

Mini-Gram – Real-Time Social Media App

Tech: Flutter, Firebase, Clean Architecture, Localization

Built a real-time social media application using Firebase Authentication, Firestore, Cloud Storage, and Cloud Functions

Implemented real-time chat, push notifications, search, favorites, and follow system

Developed posts, likes, localization (Arabic/English), and custom animations

Applied Clean Architecture with clear separation of data, domain, and presentation layers.

Bitcoin Dashboard App

Tech: Flutter, fl_chart, Clean Architecture, Local JSON

Developed a responsive Bitcoin dashboard featuring interactive fl_chart visualizations

Implemented KPI metrics and animated navigation

Integrated dynamic local JSON parsing using a clean layered architecture

TaskFlow – Full-Stack Task Management App

Tech: Flutter, Firebase, Hive, BLoC/Cubit, Clean Architecture

Built a full-stack offline-first task management application using Firebase Firestore, Hive, BLoC/Cubit, and Clean Architecture

Implemented role-based task assignment, real-time synchronization, CRUD operations, task filtering, priorities, due dates, and search.

Added activity feed, push notifications, and automatic offline synchronization

EDUCATION

Bachelor of Computers and Data Science CGPA: 3.429

Alexandria University | 09/2019 – 05/2023 | Alexandria, Egypt

SKILLS

Technical Skills: Flutter & Dart (2+ years) | State Management (BLoC, Cubit, Provider) | Firebase (Auth, Firestore, Storage, Cloud Functions) | RESTful APIs & Dio | Hive (local storage) | fl_chart | Clean Architecture | Real-time Streams | Push Notifications | Localization | Git & GitHub | Android & iOS | Java | Python | Django | PostgreSQL | Postman | HTML | CSS | SQL | OOP | Unit Testing | Responsive UI Development | Manual Testing (Functional, Smoke, Regression, Integration, End-to-End) | Jira | TestFlight

Soft Skills: Collaboration | Problem-solving | Communication | Time Management | Adaptability | Attention to detail | Mentoring

Additional Skills: Public Speaking | Writing | Research | Teamwork | Analytical Thinking | Documentation

LANGUAGES

Arabic – Mother tongue

English – Professional Working Proficiency

CERTIFICATES

ITIDA – Web Development

ITIDA – Deep Learning

Banque Misr – IT Internship

Housing and Development Bank – IT & HR Internship
